Front-End Developer

Front-end developer with deep product design experience and recent hands-on work shipping AI workflow dashboards in Next.js and TypeScript. Strong in polished, component-based UI for complex technical products, coded prototypes, MVP web apps, A/B-testable product experiments, design systems, Figma-to-code workflows, and production-quality front-end behavior. Experienced working inside development pods as the bridge between design intent, interaction behavior, QA, implementation guidance, and product delivery.

Experience

Product Design Engineer	Radium AI	Mar 2025 - Mar 2026	Vancouver, BC
- Designed and developed the Cloud Studio dashboard using Next.js and TypeScript, delivering the core AI product UI within 4 months - Built reusable interface patterns for model training, fine-tuning, inference, RAG, deployment, onboarding, dashboard status workflows, and error states - Translated AI/GPU infrastructure workflows into usable dashboard UI in partnership with AI and hardware teams - Created working prototypes for investor demos and product validation, helping secure \$7.3M in funding within 5 weeks - Reduced onboarding time by 40% by simplifying technical AI infrastructure workflows into guided product experiences			
Principal Product Designer	Microsoft	Jan 2024 - Mar 2025	Vancouver, BC
- Assisted Microsoft development pods with high-fidelity prototypes and MVP web apps for Copilot AI concepts, including Copilot Learning features and a Copilot Daily Inspiration daily briefing concept - Converted design cohort concepts into front-end-ready UI specs, including layouts, interaction states, content summary patterns, motion/video references, component behavior, and QA notes - Worked on personalized AI daily briefing flows that combined day-to-day activity summaries, calendar/schedule context, work commute information, local/global news, important events, and relevant developments using Microsoft Copilot AI - Collaborated with product designers, motion/video editors, and engineers to translate storyboarded AI experiences into prototype-ready screens, MVP web app flows, and implementation guidance - Supported prototype-driven A/B-test planning, user and stakeholder demos, and early roadmap validation before full production build-out - Partnered with design and engineering pods to reduce handoff friction and align MVP behavior with product intent; Copilot learning work contributed to a 30% DAU increase within 3 months			
Principal Product Designer	Binance.US Crypto Exchange	May 2022 - Jan 2024	Vancouver, BC
- Contributed to high-fidelity and code-forward prototypes for mobile/web trading MVPs, supporting user interviews, A/B-test hypotheses, and early roadmap validation - Worked with development pods to implement a refreshed trading design system, including component specs, interaction states, responsive behavior, and design QA - Participated in engineering standups, build reviews, implementation checks, and release reviews to improve implementation fidelity across trading, investing, account, and app workflows - Translated product-roadmap ideas into front-end-ready flows, component states, and interaction guidance for mobile and web trading experiences - Managed 4 designers while remaining embedded with development teams to support product delivery, design quality, and release readiness - Shipped and iterated trading experiences associated with 150% revenue growth and a 230% increase in trading volume within 3 months			
Senior Product Designer	Newton.co Crypto Exchange	Mar 2021 - May 2022	Vancouver, BC
- Built and documented design-system components in Figma and Storybook with developers to improve parity between design and code - Redesigned crypto trading flows with accessibility and comprehension in mind, increasing trading frequency by 50% within 6 months - Worked closely with developers on component behavior, edge cases, QA, and implementation details for trading workflows - Helped evolve Newton's crypto trading experience through design-system documentation, front-end collaboration, and product-quality improvements			
Senior Product Designer	Moola Inc	Jun 2018 - Mar 2021	Vancouver, BC

- Contributed to React Native development on a Bitcoin wallet while leading product design for a Canadian gift card savings platform
- Designed and shipped mobile/web purchase, wallet, loyalty, account, and savings flows that drove a 30% engagement lift
- Worked with engineering on UI implementation, app-flow details, mobile component behavior, interaction states, and production polish
- Helped customers save an average of \$500 per year through improved gift card discovery, purchase, and everyday savings experiences

UI/UX Designer and Web Developer Earlier Experience Jan 2008 - Dec 2018 Vancouver, BC

- Built and designed ecommerce, CRM, marketplace, and client web products across freelance projects and roles with Junglescout, Ambient Lounge, Cansel, and Reala
- Delivered hybrid design/development work across web design, UX/UI, HTML/CSS, JavaScript, CMS/ecommerce platforms, SEO, landing pages, email funnels, and digital marketing execution
- Created custom web applications, ecommerce flows, campaign pages, product experiences, and client-facing interfaces for startups, SMBs, and early-stage businesses

UI/UX Designer Junglescout Oct 2014 - Aug 2016 Vancouver, BC

- Designed UX/UI improvements for ecommerce and SaaS workflows, supporting product usability, customer acquisition, and conversion-focused product experiences
- Created wireframes, interface designs, landing pages, and product flows for web-based customer experiences

Web Designer and Ecommerce Specialist Ambient Lounge Apr 2012 - Sep 2014 Vancouver, BC

- Designed and optimized ecommerce experiences, landing pages, product pages, campaign assets, and customer purchase flows
- Supported ecommerce growth through web design, SEO, content, email marketing, and conversion-focused improvements

Web Designer Cansel 2009 - 2011 Vancouver, BC

- Designed and maintained web experiences, marketing pages, and digital assets for a B2B technology and services business
- Supported website updates, content improvements, and front-end presentation of product and service information

UX Designer and Web Designer Freelance / Contractor / Consultant Jan 2008 - Jul 2019 Vancouver, BC

- Delivered UX, UI, web design, ecommerce, CRM, and front-end implementation work for startups, SMBs, and client businesses
- Worked across research, wireframes, visual design, HTML/CSS, JavaScript, CMS/ecommerce platforms, SEO, email funnels, and digital marketing execution

Selected Projects

Founder Aerobase Dec 2024 - Present Vancouver, Canada

- Founded and designed a flight search platform that ranks routes by circadian impact, helping travelers compare itineraries by jet lag risk, recovery time, schedule quality, and travel fatigue
- Created intelligent trip-planning and jet lag recovery tools focused on healthier travel decisions and personalized flight selection

Co-Founder and Product Designer Reala — Website / CRM Real Estate Platform Aug 2016 - Oct 2018 Irvine, United States

- Co-founded and designed a real estate search and CRM platform for agents to manage listings, leads, client relationships, and property workflows
- Designed search, listing, CRM, and agent workflow experiences for real estate professionals

Education

New Media and Design, Bachelor's Degree Oct 2008 - Dec 2009 Vancouver, BC

Business Information Technology Management, Bachelor's Degree Sep 2006 - Oct 2008 Vancouver, BC

Certifications

UX Certification #1058476 Jul 2021 - Sep 2021

Nielsen Norman Group

Skills

Programming Languages:  Python,  JavaScript /  TypeScript,  HTML /  CSS,  Swift,  Java

Front-End Frameworks:  Next.js,  React,  Expo, React Native, Flutter

UI and Styling: Tailwind, NativeWind, responsive UI, dashboard interfaces, mobile/web interfaces, reusable components, accessibility, component states, production UI polish

Prototyping and Experiments: coded prototypes, MVP web apps, functional prototypes, A/B-test flows, high-fidelity prototypes, interaction specs, design QA, roadmap validation

Backend and Tooling: Supabase, PostgreSQL, Node.js, Storybook, GitHub CLI, Cursor AI, AI agent automation, LLM workflows

Product Implementation: Figma-to-code workflows, design systems, user testing, component behavior, implementation specs, release collaboration, engineering standups, build reviews

Domains: AI workflows, Microsoft Copilot AI, Copilot integrations, fintech, crypto trading, ecommerce, marketplaces, CRM platforms, learning products

Marketing and Growth: SEO, social media marketing, email funnels, viral video marketing, ecommerce optimization, landing pages, conversion-focused design
