Principal Product Designer

Principal Product Designer with 17+ years of experience designing and shipping complex AI, fintech, crypto, marketplace, ecommerce, and consumer products. Strongest at the intersection of product design, prototyping, design systems, and front-end delivery: translating early product ideas into interaction models, coded prototypes, MVP experiments, A/B-testable concepts, implementation-ready systems, and production-quality user experiences. Led design work at Microsoft, Binance.US, Newton, Moola, and Radium AI while staying close to engineering pods, front-end behavior, design QA, and product delivery.

Experience

Product Design Engineer	Radium AI	Mar 2025 - Mar 2026	Vancouver, BC
- Owned product design for Radium AI Cloud Studio, mapping AI/GPU lifecycle workflows — training, fine-tuning, RAG, inference, and deployment — into dashboard information architecture, user flows, and product experiences - Designed and developed the Cloud Studio dashboard end-to-end in Next.js and TypeScript, delivering the core product experience within 4 months - Created investor-facing prototypes and product narratives that clarified complex AI/GPU workflows and supported \$7.3M in fundraising within 5 weeks - Developed a reusable design framework for AI and hardware workflows, including dashboard layouts, job/status states, onboarding flows, and error states - Reduced new-user onboarding time by 40% by simplifying complex AI infrastructure workflows into guided, usable product experiences			
Principal Product Designer	Microsoft	Jan 2024 - Mar 2025	Vancouver, BC
- Led hybrid concept and prototype work across Copilot Learning and a Copilot Daily Inspiration concept, partnering with product designers, motion/video editors, and development pods to turn AI product ideas into high-fidelity prototypes and MVP web app experiences - Designed the Copilot Daily Inspiration concept, a personalized daily briefing experience that summarized a user's day-to-day activity, schedule, work commute, local and global news, important events, and relevant developments through Microsoft Copilot AI - Acted as the design-to-development conduit for Copilot AI concepts, translating storyboards, motion explorations, UX flows, design-system patterns, and AI interaction models into prototype-ready specs and MVP web app experiences - Assisted development teams with high-fidelity prototypes, code-forward MVP concepts, interaction states, QA notes, and implementation guidance for Copilot-powered learning and daily briefing experiences - Supported A/B-test planning, early roadmap validation, stakeholder demos, and design QA for Copilot experiments before full production build-out - Integrated Copilot AI into Microsoft learning products, contributing to a 30% increase in daily active users within 3 months			
Principal Product Designer	Binance.US Crypto Exchange	May 2022 - Jan 2024	Vancouver, BC
- Owned design for a full mobile/web app revamp across Binance.US CeFi trading experiences, bridging design and engineering to bring roadmap concepts, trading flows, and the design system into production - Served as the design-to-development conduit for the CeFi product pod, working with development teams through standups, implementation reviews, design QA, release planning, and product iteration cycles - Managed and mentored a team of 4 product designers while staying embedded with engineering pods to protect design fidelity and product quality through delivery - Created high-fidelity Figma and ProtoPie prototypes for trading workflows, user interviews, MVP validation, A/B-test hypotheses, and early product-roadmap decisions - Helped translate roadmap ideas into shippable mobile/web flows, component specs, interaction states, and production-ready UI patterns for trading, investing, account, and app experiences - Shipped and validated trading experiences associated with a 230% increase in trading volume within 3 months and 150% revenue growth within 6 months - Redesigned mobile and web UI experiences that contributed to a 30% improvement in Apple/Google App Store review performance			
Senior Product Designer	Newton.co Crypto Exchange	Mar 2021 - May 2022	Vancouver, BC

- Served as a design and technical knowledge leader, driving the evolution of Newton's crypto trading experience across accessibility, comprehension, and user confidence
- Redesigned crypto trading flows to improve accessibility and decision-making, contributing to a 50% increase in trading frequency within 6 months
- Built and documented Newton's design system in Figma and Storybook, collaborating directly with developers to improve component parity between design and code
- Partnered with product and engineering teams on component behavior, edge cases, implementation details, and design QA for trading workflows

Senior Product Designer **Moola Inc** **Jun 2018 - Mar 2021** Vancouver, BC

- Led product design for a Canadian gift card savings platform, designing purchase, wallet, loyalty, account, and everyday savings flows for a consumer fintech product
- Contributed to React Native development on a Bitcoin wallet, partnering with developers on mobile UI components, interaction states, app-flow details, and design QA
- Designed and shipped engagement and savings-focused product improvements that increased user engagement by 30%
- Helped customers save an average of \$500 per year through improved gift card discovery, purchase, and savings experiences

UI/UX Designer and Web Developer **Earlier Experience** **Jan 2008 - Dec 2018** Vancouver, BC

- Delivered hybrid design and development work across ecommerce platforms, CRM products, marketplace experiences, custom web applications, and client projects
- Designed and built web, ecommerce, and product experiences across freelance/contract work and full-time roles for Junglescout, Ambient Lounge, Cansel, and Reala
- Combined UX design, web design, front-end implementation, ecommerce optimization, SEO, content, email funnels, and analytics-driven product improvements across early-stage and client businesses

UI/UX Designer **Junglescout** **Oct 2014 - Aug 2016** Vancouver, BC

- Designed UX/UI improvements for ecommerce and SaaS workflows, supporting product usability, customer acquisition, and conversion-focused product experiences
- Created wireframes, interface designs, landing pages, and product flows for web-based customer experiences

Web Designer and Ecommerce Specialist **Ambient Lounge** **Apr 2012 - Sep 2014** Vancouver, BC

- Designed and optimized ecommerce experiences, landing pages, product pages, campaign assets, and customer purchase flows
- Supported ecommerce growth through web design, SEO, content, email marketing, and conversion-focused improvements

Web Designer **Cansel** **2009 - 2011** Vancouver, BC

- Designed and maintained web experiences, marketing pages, and digital assets for a B2B technology and services business
- Supported website updates, content improvements, and front-end presentation of product and service information

UX Designer and Web Designer **Freelance / Contractor / Consultant** **Jan 2008 - Jul 2019** Vancouver, BC

- Delivered UX, UI, web design, ecommerce, CRM, and front-end implementation work for startups, SMBs, and client businesses
- Worked across research, wireframes, visual design, HTML/CSS, JavaScript, CMS/ecommerce platforms, SEO, email funnels, and digital marketing execution

Selected Projects

Founder **Aerobase** **Dec 2024 - Present** Vancouver, Canada

- Founded and designed a flight search platform that ranks routes by circadian impact, helping travelers compare itineraries by jet lag risk, recovery time, schedule quality, and travel fatigue
- Created intelligent trip-planning and jet lag recovery tools focused on healthier travel decisions and personalized flight selection

Co-Founder and Product Designer **Reala — Website / CRM Real Estate Platform** **Aug 2016 - Oct 2018** Irvine, United States

- Co-founded and designed a real estate search and CRM platform for agents to manage listings, leads, client relationships, and property workflows
- Designed search, listing, CRM, and agent workflow experiences for real estate professionals

Education

New Media and Design, Bachelor's Degree **Oct 2008 - Dec 2009**
 British Columbia Institute of Technology Vancouver, BC
Business Information Technology Management, Bachelor's Degree **Sep 2006 - Oct 2008**
 British Columbia Institute of Technology Vancouver, BC

Certifications

UX Certification #1058476
Nielsen Norman Group

Jul 2021 - Sep 2021

Skills

Programming Languages:  Python,  JavaScript /  TypeScript,  HTML /  CSS,  Swift,  Java

Frameworks and Platforms:  Next.js,  React,  Expo, React Native, Flutter, Node.js, Supabase, PostgreSQL

Product Design: Figma, UX/UI design, product strategy, interaction design, information architecture, wireframing, high-fidelity prototyping, user flows, accessibility, qualitative analysis, usability testing, user research, A/B testing

Hybrid Product Delivery: design-to-development conduit, coded prototypes, functional prototypes, MVP validation, roadmap validation, A/B-testable concepts, implementation specs, design QA, build reviews, release collaboration

Design Systems: Figma design systems, design tokens, component libraries, Storybook collaboration, component parity, mobile/web systems, documentation, design QA

AI Product Work: Microsoft Copilot AI, AI agent automation, LLM workflows, RAG interfaces, AI cloud dashboards, model training workflows, fine-tuning workflows, inference workflows, deployment workflows

Developer Tools: Storybook, GitHub CLI, Cursor AI, Tailwind, NativeWind, design-to-code workflows, front-end behavior specs

Marketing and Growth: SEO, social media marketing, email funnels, viral video marketing, ecommerce optimization, landing pages, conversion-focused design
